Headset Models: CO-8WD | CR-8D

Omnidirectional or Cardioid Elements

Sizable Headframes for Steadiness

Our headset microphones are a great choice for active speakers or performers because the dual earhooks help the microphone sit firmly in place. The boom of the headset microphone can be adjusted for longer or shorter lengths to obtain—and maintain—an optimal position at the corner of the mouth. These tiny 3mm headset microphone elements are small in size, but big in performance and durability. Both headsets offer our flagship "unbreakable boom" bendable to 360°.
